# Specifications

- Fan Speed: 1,400 - 2,500 RPM
- Power: 2.5W
- Voltage: 5VDC

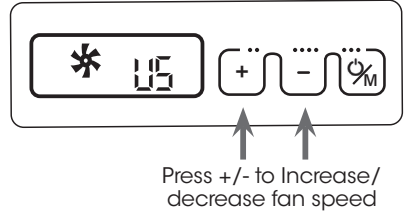

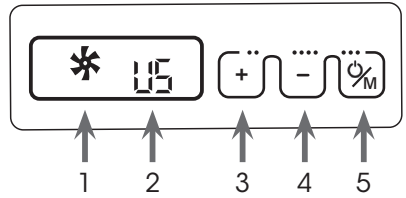

# Setup

1. Lift up the laptop rest and place your laptop on the pad.
2. Lift the back of the pad and adjust the stand for a comfortable viewing position.
3. Plug one end of the USB cable supplied into a USB socket on your laptop and the other end into one of the sockets on the back of the pad. The cooling fans will switch on automatically.

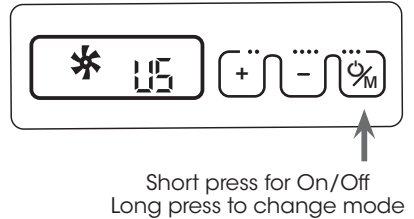

## Controls and indicators

1. Fan speed indicator.
2. Fan speed setting.
3. Press to increase speed.  
Long press to switch fan LED on or off
4. Press to reduce speed.
5. Press for power on/off,  
long press to change mode.

## Mode Setting

1. Press and hold for 1.5 seconds to activate the main central fan on its own.
2. Press and hold down again for 1.5 seconds to switch off the main central fan and activate the four smaller fans.
3. Press and hold down again for 1.5 seconds to activate all five fans.

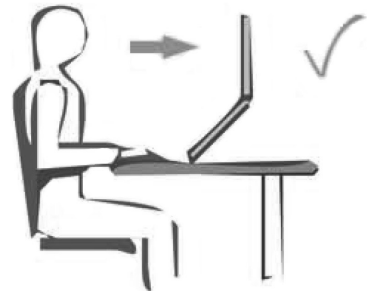

## Recommended viewing position

Your cooling pad has a five position adjustable stand.

Getting the position correct will reduce back and eye strain.

Adjust the cooling pad so that your spine and neck are straight and the screen is straight ahead.

## Disclaimer

Updates to Firmware and/or hardware components are made regularly. Therefore some of the instructions, specifications and pictures in this documentation may differ slightly from your particular situation. All items described in this guide are for illustration purposes only and may not apply to your particular situation.
